CORROSION — 1982 INDEX

This complete index to the 12 issues of *Corrosion* journal published in 1982 includes the technical contents of each issue, an alphabetical subject index, and an alphabetical author index. To locate information published during 1982, refer to the designated month and page number. Reprints of any article that has been published in *Corrosion* are available from NACE Headquarters, P. O. Box 218340, Houston, Texas 77218.

Corrosion — Technical Contents Index, Volume 38, 1982

January

HVEM Observations of Crack Tip Produced in Type 304 Stainless Steel by SCC and HE
Takenori Nakayama and Michinori Takano 1

Application of Acoustic Emission to Detection of Reinforcing Steel Corrosion in Concrete
Ming S. Weng, Stanley E. Dunn, William H. Hartt, and Robert P. Brown 9

Deposition Rate of Suspended Hematite in a Boiling Water System Under BWR Conditions
Takayuki Mizuno, Kunihisa Wada, and Toru Iwahori 15

The Effect of Hydrogen Sulfide in Crude Oil on Fatigue Crack Growth in a Pipeline Steel
O. Vosikovsky and A. Rivard 19

Effect of Lithium Hydroxide on Corrosion Rate of Zirconium-2.5 Wt% Niobium in 340 C Water
A. V. Manolescu, P. Mayer, and C. J. Simpson 23

Corrosion Behavior of Cr_2O_3-Former Alloys in H_2-H_2S-H_2O Atmospheres
H. Hindam and D. P. Whittle 32

Effect of Composition and Heat Treatment on Stress Corrosion Cracking of Alloy 600 Steam Generator Tubes in Sodium Hydroxide
J. R. Crum 40

The Composition of the Surface During Passivation of Stainless Steels
Ingemar Olefjord and Bengt-Olof Elfstrom 46

Crack Initiation in CERT Tests on Type 304 Stainless Steel in Pure Water
Peter L. Andresen 53

Discussion: Comparative Corrosion Tests on Steel Plates Rolled from Continuously Cast Slabs and Rolled from Mold Cast Ingots
G. Wranglen 59

Technical Note: Quantum Chemical Parameters and Corrosion Inhibition Efficiency of Some Organic Compounds
Gladius Lewis 60
Erratum 125

February

Pitting Behavior of Duplex 308L Stainless Steel in Methanol/Water/HCl Solutions
P. Hronsky and D. J. Duquette 63

An Electrochemical Study on the Role of Dissolved Oxygen in the IGSCC of Sensitized Type 304 Stainless Steel in Dilute Na_2SO_4 Solution at 285 C
K. Fujiwara, H. Tomari, K. Shimogori, and T. Fukuzuka 69

The Effect of Fluid Flow on the Stress Corrosion Cracking of ASTM A508 Cl 2 Steel and AISI Type 304 Stainless Steel in High Temperature Water
H. Chol, F. H. Beck, Z. Szklarska-Smialowska, and D. D. Macdonald . 76

The Use of Electrochemical and Surface-Analytical Techniques to Characterize Passive Oxide Films on Nickel
B. MacDougall, D. F. Mitchell, and M. J. Graham 85

Experimental Evaluation of a Metallurgical Model for Austenitic Stainless Steels Sensitization
D. Sinigaglia, P. Fassina, D. Wenger, and G. Re 92

Kinetics of Hydrogen Formation from Mild Steel in Water Under Anaerobic Conditions
J. Jelinek and P. Neufeld 98

Inhibition of Stress Corrosion Cracking of Type 403 Stainless Steel in Sodium Sulfate Solutions
B. Bavarian, A. Moccari, and D. D. Macdonald 104

Technical Note: Effect of Cooling Rate and Subsequent Plastic Deformation on the Corrosion Rate of AISI 304 in Boiling Nitric Acid
Christopher Hahin 116
Erratum 235

Technical Note: Auger Analysis of Benzimidazole-Passivated Copper
Gladius Lewis 119

Technical Note: Transmission Electron Microscopy of Stress Corrosion Cracks in Type 316
J. M. Silcock 122

March

The Effect of Phosphorus on Intergranular Caustic Cracking of NiCr Steel
N. Bandyopadhyay and C. L. Briant 125

The Stress Corrosion Cracking of Sensitized Stainless Steel in Thiosulfate Solutions
H. S. Isaacs, B. Vyas, and M. W. Kendig 130

Stress Corrosion Cracking of ASTM A508 Cl 2 Steel in Oxygenated Water at Elevated Temperatures
H. Choi, F. H. Beck, Z. Szklarska-Smialowska, and D. D. Macdonald 136

Nucleation and Growth of Stress Corrosion Cracks in Austenitic Steels with Varying Ni and Mo Contents
J. M. Silcock 144

Low Alloy Steels in Hydrogen Sulfide Environment
Yuichi Yoshino 156

Erratum 297

Galvanic Factors in the Corrosion of Steel in Liquid Ammonia
B. E. Wilde and C. D. Kim 168

Reaction Rate Studies for the Corrosion of Metals in Acids—1, Iron in Mineral Acids
P. B. Mathur and T. Vasudevan . . . 171

Technical Note: Inhibition of the Cathodic Reaction on Zinc in Aerated 3% NaCl Solution
H. Leidheiser, Jr., Y. Momose, and R. D. Granata 178

Discussion: Surface Composition of Stainless Steel During Propagation of Crevice Corrosion
G. Wranglén 180

Discussion: The Significance of External Polarization on Stress Corrosion Crack Growth by Anodic Dissolution
Bryan Poulson 181

April

A Computer Program for Constructing Stability Diagrams in Aqueous Solutions at Elevated Temperatures
C. M. Chen and K. Aral 183

Corrosion Product Formation in Simulated Energy Systems
P. Fabis, C. Brown, T. Rockett, and R. Heidersbach 191

The Influence of Phosphorous Alloy Additions on the Zinc Phosphate Coating Formation on Cold Rolled Steels
James A. Kargol and Donald L. Jordan 201

Influence of a $CuSO_4$ Treatment on Atmospheric Steel Rust Formation—A Mössbauer Spectroscopy Study
C. Saragovi-Badler, I. A. Maier, and F. Labenski 206

Formation of Spherical Colloidal Nickel Ferrite Particles as Model Corrosion Products
Alberto E. Regazzoni and Egon Matijevic 212

An Electrochemical Method for Hydrogen Determination in Steel
Tadeusz Zakroczymski 218

Corrosion Phenomena for Iron Covered with a Cellulose Nitrate Coating
J. J. Ritter and M. J. Rodriguez 223

The Galvanic Corrosion of Steel in Sodium Chloride Solution
Bunzo Tsujino and Sunao Miyase 226
Discussion 624

Technical Note: The Effect of Alloying Elements on Impurity Induced Intergranular Corrosion
C. L. Briant 230

Technical Note: Cathodic Protection of Mild Steel in Flowing Natural Sea Water
G. M. Schmid 233

Discussion: A Potentiometric Study of the Corrosion of Ni-Resist in Sea Water
Frank LaQue 234

May

Electrochemical Behavior of Passive Layers on Titanium
M. S. El-Basiouny and A. A. Mazhar 237
Erratum 456

Investigations of Corrosion with Measurement and Compensation of the Ohmic Drop
Monika Berthold and Sigrun Herrmann 241

Stress Corrosion Cracking of 70/30 Brass in Acetate, Formate, Tartrate, and Hydroxide Solutions
R. N. Parkins and N. J. H. Holroyd 245

Corrosion of Carbon Steel in Hot NaOH Solutions Under Heat Transfer Conditions
M. Yasuda, M. Okada, and F. Hine 256

Effects of Sulfur Compounds on the Pitting Behavior of Type 304 Stainless Steel in Near-Neutral Chloride Solutions
R. C. Newman, H. S. Isaacs, and B. Alman 261

The Effect of Surface Treatments and Electrochemical Methods on the Pitting Potentials of Zirconium in Chloride Solutions
Donald R. Knittel, Michael A. Maguire, Arturo Bronson, and John-Sheng Chen 265

Effect of Microstructure on Pitting and Corrosion Fatigue of 17-4 PH Turbine Blade Steel in Chloride Environments
B. C. Syrett, R. Viswanathan, S. S. Wing, and J. E. Wittig 273

Intergranular Stress Corrosion Cracking of 13% Cr and 18% Cr Ferritic Stainless Steels in High Temperature High Purity Water
H. Tomari, K. Fujiwara, K. Shimogori, T. Fukuzuka, and M. Kanda 283

Technical Note: A Finite Element Analysis of Corrosion Cells
John W. Fu 295

June

Auger Electron Spectroscopic Studies on Oxide Films of Some Austenitic Stainless Steels
J. R. Cahoon and R. Bandy 299

Inhibition of Pitting Corrosion of Mild Steel in Neutral Solutions
G. Pallos and G. Wallwork 305

Electrochemical (Corrosion) Behavior of Amorphous/Microcrystalline Ion Plated Fe-Cr Alloy Films
Welville B. Nowak and Boniface A. Okorie 314

On the Nature of the Occluded Cell in the Stress Corrosion Cracking of AA 7075-T651—Effect of Potential, Composition, Morphology
T. H. Nguyen, B. F. Brown, and R. T. Foley 319

An Accelerated Intergranular Corrosion Test for Detecting Sensitization in Low Chromium Ferritic Stainless Steels
T. M. Devine and B. J. Drummond . 327

Effects of Overloads on the Incubation Time for Stress Corrosion Cracking of 7075 Aluminum
A. H. Hanisch and L. H. Burck 330

Whitney Award Lecture—1982 Improving the Ability to Predict Corrosion Behavior Through Corrosion Research
Ellis D. Verink, Jr. 336

Stress Corrosion Cracking of Sensitized 304 Austenitic Stainless Steel in Petroleum Refinery Environment
S. Ahmad, M. L. Mehta, S. K. Saraf, and I. P. Saraswat 347

July

The Oxidation of Fe_3O_4 on Iron and Steel Surfaces
Joseph T. Keiser, Chris W. Brown and Robert H. Heidersbach 357

Corrosion of Heat Exchanger Materials in Simulated Fluidized Bed
K. Natesan 361

Corrosion of Painted Metals—A Review
Henry Leidheiser, Jr. 374

The Study of Inhibitors for Sour Gas Service
Kazuyuki Suzuki, Takashi Kouno, Eiji Sato, and Tomomi Murata 384

The Electrochemical Potentiokinetic Reactivation Method—An Analysis of Different Treatments of Experimental Data
A. Mignone, A. Borello, and A. La Barbera 390

August

Pit Formation in the Cathodic Polarization of Passive Iron, III. Stimulation of Pit Initiation and Uniform Dissolution by Chelating Agents
Kotaro Ogura and Takahiko Ohama 403

Intergranular Stress Corrosion Cracking of Austenitic Stainless Steel at Temperatures Below 100 C—A Review
G. Cragnolino and
D. D. Macdonald 406
Errata 559

Impedance Measurement by Laplace Transformation of Microprocessor Obtained Data from Corrosion Cells
Lindsay F. G. Williams and
Russell J. Taylor 425

Dependence of Corrosion Fatigue Crack Initiation Mechanisms on the Corrosion Behavior of Two Stainless Chromium Steels
Matthias P. Mueller 431
Erratum 559

The Effects of Surface Modification on the Stress Corrosion Cracking Behavior of 316 Stainless Steel
R. P. Walters, N. S. Wheeler, and
B. D. Sartwell 437

Hydrogen Induced Delayed Cracking of Type III Steel Specimens
Wu-Yang Chu, Chi-Mei Hsiao,
Shur-Yahn Ju, and Cheng Wang .. 446

Technical Note: Presence of Solid $Fe(OH)_2$ in EMF-pH Diagram for Iron
David C. Silverman 453

September

The Effect of Nickel on Hydrogen Cracking Resistance in Low Alloy Steels—A Review
Bruce D. Craig 457

Hydrogen Embrittlement Behavior of the Amorphous Alloy $Fe_{32}Ni_{36}Cr_{14}P_{12}B_6$
H. S. Tong and J. E. Macur 464

Sensitization of Austenitic Stainless Steels, I. Controlled Purity Alloys
C. L. Briant, R. A. Mulford, and
E. L. Hall 468

Evaluation of Corrosion Behavior of Coated Metals with AC Impedance Measurements
F. Mansfeld, M. W. Kendig, and
S. Tsai 478

Permeation of Hydrogen, Trapping, and Damage in Spheroidized AISI 1090 Steel
S. X. Xie and J. P. Hirth 486

Electrochemical Behavior of Steel in Concrete as a Result of Chloride Diffusion into Concrete: Part 2
Changiz Dehghanian and
Carl E. Locke 494

Erosive Wear of Advanced Ceramics in Coal-Slurry Streams
D. K. Shetty, I. G. Wright, A. H. Clauer,
J. H. Peterson, and W. E. Merz 500
Erratum 559

Technical Note: The Corrosion Effect of Solutions of Lasing Dyes on Metals
E. Rabinovitz, B. Herrmann,
R. Levin, and I. Rosenthal 510

October

The Influence of Noble Metal Additions on the Sulfide Corrosion Performance of AISI 4130 Steel
B. E. Wilde, C. D. Kim,
and J. C. Turn, Jr. 515

Haloacetic Acids as Corrosion Inhibitors for Brass in Nitric Acid
R. K. Dinnappa and
S. M. Mayanna 525

Effects of Impurities and Supporting Electrolytes on SCC of 304 Stainless Steel in High Temperature Aqueous Environments
Peter L. Andresen and
Maurice E. Indig 531

Application of EMF-pH Diagrams to Corrosion Prediction
David C. Silverman 541

The Stress Corrosion Cracking of Deformed Austenitic Stainless Steel in an Acidified Chloride Solution
F. P. Vaccaro, R. H. Hehemann,
and A. R. Troiano 549

Technical Note: The Effect of Uncompensated Resistance on the True Scan Rate in Potentiodynamic Experiments
Florian Mansfeld 556

November

Research of Hydrogen Induced Cracking and Stress Corrosion Cracking in an Aluminum Alloy
Wu-yang Chu, Yan-bin Wang,
and Chi-Mei Hsiao 561

Recording and Analysis of AC Impedance Data for Corrosion Studies, II. Experimental Approach and Results
F. Mansfeld, M. W. Kendig,
and S. Tsai 570

An Evaluation of the Three-Point Method to Measure Corrosion Rates
Mike J. Danielson 580

Corrosion Fatigue of Nickel and Nickel-Base Alloys
A. I. Asphahani and
N. Sridhar 587

Technical Note: Sensitization of Partially Martensitic Stainless Steels at Very Low Temperatures
C. L. Briant 596

December

Comparative Electron Microscopy (SEM) Examination of Fe, Au, and Zn Electrode Surfaces Polarized in Different Regions of Potentiostatic E/I Behavior
J. J. Podestá, R. C. V. Piatti,
and A. J. Arvia 599

Effect of Temperature on the Stress Corrosion Cracking of Tempered Type 403 Martensitic Stainless Steel in Sodium Sulfate Solution
B. Bavarian, Z. Szklarska-Smialowska, and
D. D. Macdonald 604

Stress Corrosion Cracking of 72/28 Brass in Sodium Chlorate Solution
V. K. Gouda, H. A. El-Sayed, and
G. M. Sherbini 609

The Performance of Zirconium Alloys in Sulfide Solutions
Te-Lin Yau 615

Technical Note: Three-Point Method for Evaluating Corrosion Current and Tafel Slopes from a Single Polarization Curve
S. Barnartt and M. Donaldson 621

Discussion: The Galvanic Corrosion of Steel in Sodium Chloride Solution
Frank LaQue 624

Corrosion — Alphabetical Subject Index, Volume 38, 1982

The subject index of this volume of *Corrosion* is derived from controlled printout of the indexing terms taken from the NACE Corrosion Science and Technology Indexing Outline which is being used for computer entry of topical indexes of all NACE publications. Additional information about the indexing outline and use of computerized access to NACE literature is available from: Information Service, NACE, P. O. Box 218340, Houston, Texas 77218.

A

ABSORPTION
electrochemical analysis of hydrogen in, (4)218
H induced cracking of aluminum alloy, (11)561

ACCELERATED LABORATORY TESTING
accel test for sensitization Cr ferritic, (6)327
acoustic detection of steel attack, (1)9
electrochemical potentiokinetic reactivation, (7)390
fatigue of nickel and nickel-base alloys, (11)587
hydrogen permeation of 1090, (9)486
occluded cells in SCC of AA 7075-T651, (6)319
overload infl on SCC of 7075 aluminum, (6)330
sensitization of pure austenitic stainless, (9)468

Acetates, SCC of brass in, (5)245

ACETIC ACIDS
alloying 4130 vs sulfide stress cracking, (10)515
haloacetic acid inhib of brass in HNO_3, (10)525
zirconium vs sulfide solutions, (12)615

Acid, zirconium vs sulfide solutions, (12)615
Acids, inorganic, surface composition stainless passivated in, (1)46
Acoustic detection of steel attack, (1)9
Adhesion, corrosion of painted metals—review, (7)374

AIR
fatigue of nickel and nickel-base alloys, (11)587
inhibition of zinc in sodium chloride, (3)178

ALLOYING
alloying 4130 vs sulfide stress cracking, (10)515
infl of P on Zn phosphate coating on steel, (4)201
intergran SCC of aust SS below 100 C, (8)406
low alloy steels in hydrogen sulfide, (3)156
nucleation growth cracks in austenitic, (3)144
SCC of 13 and 18 Cr steels in hi purity, (5)283
sensitization of pure austenitic stainless, (9)468
surface composition stainless steel passivation, (1)46

ALLOYING
fatigue of nickel and nickel-base alloys, (11)587
low alloy steels in hydrogen sulfide, (3)156
Ni effects on hydrogen cracking of steel, (9)457
SCC alloy 600 steam generator tubes, (1)40
sensitization of pure austenitic stainless, (9)468
surface comp SS during crevice corrosion, (3)180

ALTERNATING CURRENT
impedance tests on coated metals, I, (9)478
impedance II—experimental + results, (11)570

Alumina refractories, erosion of ceramics in coal slurry, (9)500

ALUMINUM
AC impedance tests on coated metals, I, (9)478
AC impedance II—experimental + results, (11)570
dye solutions vs Cr Ni steels, aluminum, (9)510
H induced cracking of aluminum alloy, (11)561
occluded cells in SCC of AA 7075-T651, (6)319
overload infl on SCC of 7075 aluminum, (6)330

Ambient temperature, SCC ASTM A508 steel in hi temp water + 0, (3)136

AMMONIA
galvanic factors, steel vs ammonia, (3)168
occluded cells in SCC of AA 7075-T651, (6)319

Anaerobic, hydrogen formation under conditions, (2)98

ANODIC ELECTRODE PHENOMENA
corrosion current, Tafel slope evaluation, (12)621
dissolved oxygen role in 304 IGSCC 285 C, (2)69
electrochem effects of chlorides, (9)494
electrochemistry of passive layers on titanium, (5)237

ANODIC INHIBITORS
pitting of mild steel in neutral sol, (6)305
zinc in sodium chloride, (3)178

AQUEOUS ENVIRONMENTS
computer program stability diagrams, (4)183
hydrogen formation under anaerobic conditions, (2)98
impurities vs SCC of 304 in hi temp water, (10)531

AREA EFFECT
galvanic attack on steel in chloride sol, (4)226
galvanic factors, steel vs ammonia, (3)168

ASCORBIC ACID
intergran SCC of aust SS below 100 C, (8)406
SCC sensitized 304 in petro refinery, (6)347

Atmospheric on-site testing, Cu sulfate infl on rust form, (4)206

ATOMIC EFFECTS
alloying 4130 vs sulfide stress cracking, (10)515
analysis of benzimidazole passive copper, (2)119
nucleation growth cracks in austenitic, (3)144
zirconium vs sulfide solutions, (12)615

Atomic radiation, hematite in boiling water reactors, (1)15

B

Bibliographies, intergran SCC of aust SS below 100 C review, (8)406
Bleaches, Na sulfate temp vs SCC of tempered 403, (12)604
Blistering failure of painted metals—review, (7)374

BLISTERING OF MATERIALS
alloying 4130 vs sulfide stress cracking, (10)515
hydrogen permeation of 1090, (9)486

Bonds, corrosion of painted metals—review, (7)374
Boric acid, SCC sensitized SS in thiosulfate solutions, (3)130
Borides, erosion of ceramics in coal slurry stream, (9)500

BRASS
dye solutions vs Cr Ni steels, aluminum, (9)510
haloacetic acid inhib of brass in HNO_3, (10)525
SCC of brass in acetate and other solutions, (5)245
SCC 72-28 brass in sodium chlorate solution, (12)609

Bromic acid, haloacetic acid inhib of brass in HNO_3, (10)525

C

Cadmium, EMF-pH diagrams to predict corrosion, (10)541
Calcium causes, heat exch vs fluidized bed coal combustion, (7)361

CALCULATIONS
computer program stability diagrams aqueous, (4)183
corrosion current, Tafel slope evaluation, (12)621
electrochemical potentiokinetic reactivation, (7)390
EMF-pH diagrams to predict corrosion, (10)541
finite element analysis of corrosion, (5)295
inhibition efficiency organic compounds, (1)60
measurement of ohmic drop in potentiostat, (5)241
model for austenitic stainless sensitization, (2)42
resistance effect on potential scan rate, (10)556
three-point rate measurement evaluation, (11)580

Carbides, erosion of ceramics in coal slurry stream, (9)500
Na sulfate temp vs SCC of tempered 403, (12)604

CARBON
low alloy steels in hydrogen sulfide vs, (3)156
Ni effects on hydrogen cracking of steel, (9)457

CARBON STEEL, WROUGHT
alloying vs impurity induced corrosion, (4)230
Cu sulfate infl on atmospheric rust form, (4)206
galvanic attack on steel in NaCl solution, (12)624
heat exch vs fluidized bed coal combustion, (7)361
inhibiting pitting of mild steel in neutral, (6)305
inhibitors for sour gas service, (7)384
oxidation of Fe_3O_4 on iron and steel, (7)357

Casting, tests continuous vs mold cast slabs, (1)59
Catalytic effects, hydrogen formation under anaerobic conditions, (2)98
Cathodic electrode phenomena, corrosion current, Tafel slope evaluation, (12)621

CATHODIC PROTECTION
cathodic protection steel in sea water, (4)233
finite element analysis of corrosion cells, (5)295
galvanic factors, steel vs ammonia, (3)168

CELLS
finite element analysis, (5)295
impedance measurement from, (8)425

Cellulosic coatings, iron with cellulose nitrate coating, (4)223
Ceramics, erosion in coal slurry stream, (9)500
Chelants, pitting of passive iron III—chelation, (8)403

CHEMICAL OR ELECTROCHEMICAL TESTS
analysis of passive films on nickel, (2)85
computer program stability diagrams, (4)183
dissolved oxygen role in 304 IGSCC 285 C, (2)69
electrochemical analysis of hydrogen in, (4)218
electrochemical potentiokinetic reactivation, (7)390
electrochemistry of passive layers on titanium, (5)237
inhibition efficiency organic compounds, (1)60
intergran SCC of aust SS below 100 C, (8)406
pitting and fatigue of 17-4 PH, (5)273
pitting of passive iron III—chelation, (8)403
pitting of zirconium in chloride solution, (5)265
predicting corrosion through research, (6)336
solid iron oxide zone in EMF-pH diagram, (8)453
surface composition stainless steel passivation, (1)46

Chlorates, SCC 72-28 brass in sodium, (12)609
Chloric acid, haloacetic acid inhib of brass in, (10)525

CHLORIDES
C steel vs hot NaOH under heat transfer, (5)256
galvanic attack on steel in NaCl solution, (12)624
impurities vs SCC of 304 in hi temp water, (10)531
inhibiting pitting of mild steel in neutral, (6)305
intergran SCC of aust SS below 100 C, (8)406
iron with cellulose nitrate coating vs, (4)223
pitting of zirconium in chloride solution, (5)265
zirconium vs sulfide solutions, (12)615

Chlorine, corrosion products in energy systems, (4)191

CHROMIUM
corrosion products in energy systems, (4)191
low alloy steels in hydrogen sulfide vs, (3)156
nucleation growth cracks in austenitic SS, (3)144

Chromium coatings, behavior of ion plated Fe Cr alloy films, (6)314

Cleaning, AC impedance tests on coated metals, (9)478

COAL
erosion of ceramics in coal slurry stream, (9)500
heat exch vs fluidized bed combustion, (7)361

COATINGS
corrosion of painted metals—review, (7)374
iron with cellulose nitrate coating, (4)223

Cobalt, chromium oxide-former alloys in hydrogen, (1)32

COLD FABRICATION
cooling, deformation effect on 304, (2)116
hydrogen permeation of 1090, (9)486
nucleation growth cracks in austenitic SS, (3)144

COLD WORK
SCC of deformed 301 steel in acid chlorides, (10)549
surface prep vs 316 stress cracking, (8)437

Combustion gases, heat exch vs fluidized bed coal combustion, (7)361

COMPRESSIVE STRESS
crack initiation 304 in pure water, (1)53
erosion of ceramics in coal slurry stream, (9)500
surface prep vs 316 stress cracking, (8)437

COMPUTER CALCULATIONS
AC impedance II—experimental + results, (11)570
corrosion current, Tafel slope evaluation, (12)621

EMF-pH diagrams to predict corrosion, (10)541
impedance measurement from corrosion cells, (8)425
predicting corrosion through research, (6)336

Concentration, inhibitors for sour gas service, (7)384
Concentration, 10 percent, haloacetic acid inhib of brass in HNO_3, (10)525
Concentration cells, iron with cellulose nitrate coating, (4)223

CONCENTRATION OF CHEMICALS
C steel vs hot NaOH under heat transfer, (5)256
crack tip in 304 by SCC, (1)1
galvanic attack on steel in chloride sol, (4)226
sensitization of pure austenitic stainless, (9)468

Concrete, electrochem effects of chlorides in, (9)494

CONDUCTIVITY
AC impedance II—experimental + results, (11)570
galvanic factors, steel vs ammonia, (3)168

Contamination, impurities vs SCC of 304 in hi temp water, (10)531
Conversion coatings, AC impedance tests on coated metals, (9)478
Cooling, aqueous environments, lithium hydrox vs zirconium-niobium, (1)23

COPPER
alloying 4130 vs sulfide stress cracking, (10)515
analysis of benzimidazole passive copper, (2)119
Cu sulfate infl on atmospheric rust form, (4)206
dye solutions vs Cr Ni steels, aluminum, (9)510
galvanic attack on steel in chloride sol, (4)226
hydrogen formation under anaerobic conditions, (2)98
impedance measurement from corrosion cells, (8)425
low alloy steels in hydrogen sulfide, (3)156
zirconium vs sulfide solutions, (12)615

Corrosion-erosion, of ceramics in coal slurry stream, (9)500

CORROSION PRODUCTS
hydrogen formation under anaerobic conditions, (2)98
nickel ferrite particles as model corrosion, (4)212
predicting corrosion through research, (6)336

CRACKING
crack initiation 304 in pure water, (1)53
effect of P on caustic cracking Ni Cr steel, (3)125
fatigue crack initiation of 12-18 Cr steel, (8)431
fatigue of nickel and nickel-base alloys, (11)587
hydrogen permeation of 1090, (9)486
hydrogen sulfide in crude oil effects, (1)19
low alloy steels in hydrogen sulfide, (3)156
pitting and fatigue of 17-4 PH in chloride, (5)273
SCC sensitized SS in thiosulfate solution, (3)130
velocity effects on SCC of carbon & 304, (2)76

CREVICES
occluded cells in SCC of AA 7075-T651, (6)319
surface comp SS during crevice corrosion, (3)180

CURRENT DENSITY, ON-SITE TESTING
cathodic protection steel in sea water, (4)233
finite element analysis of corrosion cells, (5)295

CYANIDES
intergran SCC of aust SS below 100 C review, (8)406
S vs pitting of 304 SS in chloride solution, (5)261

Cyclic stresses vs hydrogen sulfide in crude oil, (1)19
Cycling laboratory testing, impurities vs SCC of 304 in hi temp water, (10)531

D

DATA CORRELATION
hydrogen formation under anaerobic conditions, (2)98
three-point rate measurement evaluation, (11)580

Deaeration, impurities vs SCC of 304 in hi temp water, (10)531
Dealloying predicting corrosion through research, (6)336

DEHYDRATION
behavior of ion plated Fe Cr alloy films, (6)314
fatigue of nickel and nickel-base alloys, (11)587

Delamination, of painted metals—review, (7)374
Desorption, electrochemical analysis of hydrogen, (4)218

DIFFUSION
alloying 4130 vs sulfide stress cracking, (10)515
impedance measurement from corrosion cells, (8)425

Dislocations, hydrogen permeation of 1090, (9)486
Dissolution, electrochemistry of passive layers on titanium, (5)237
Drill stems, zirconium vs sulfide solutions, (12)615
Drinking water, AC impedance II—experimental + results, (11)570
Ducts (see pipes also), SCC of 13 and 18 Cr steels in hi purity, (5)283
Dyes, solutions vs Cr Ni steels, aluminum, (9)510

E

EDGE EFFECTS
Na sulfate temp vs SCC of tempered 403, (12)604
nickel ferrite particles as model corrosion products, (4)212

ELECTRICAL INSTRUMENTATION
AC impedance II—experimental + results, (11)570
three-point rate measurement evaluation, (11)580

Electrical resistance rate meters, three-point rate measurement evaluation, (11)580

ELECTROCHEMICAL ACCELERATED TESTING
analysis of passive films on nickel, (2)85
effects of chlorides, (9)494
fatigue of nickel and nickel-base alloys, (11)587

ELECTROCHEMICAL SURFACE PREPARATION
pitting of zirconium in chloride solutions, (5)265
surface prep vs 316 stress cracking, (8)437

ELECTRODE PHENOMENA
inhibition of zinc in sodium chloride solutions, (3)178
predicting corrosion through research, (6)336

Electrodes instrumentation, AC impedance II—experimental + results, (11)570

ELECTRON EFFECTS
inhibition efficiency organic compounds, (1)60
Ni effects on hydrogen cracking of steel, (9)457

ELECTRON MICROSCOPE TESTING
alloying 4130 vs sulfide stress cracking, (10)515
analysis of benzimidazole passive copper, (2)119
crack tip in 304 by SCC and hydrogen embrit, (1)1
electron microscopy of 316 SS, (2)122
Fe, Au, Zn electrodes polarized in, (12)599
SCC 72-28 brass in sodium chlorate solutions, (12)609

Ellipsometric testing, iron with cellulose nitrate coating, (4)223
Erosion, of ceramics in coal slurry stream, (9)500
Ethyl Alcohols, dye solutions vs Cr Ni steels, aluminum, (9)510

F

Failure analysis, SCC of deformed 301 steel in acid chlorides, (10)549

FATIGUE
fatigue crack initiation of 12-18 Cr steel, (8)431
hydrogen sulfide in crude oil effects, (1)19
pitting and fatigue of 17-4 PH in chlorides, (5)273

Fatigue, laboratory testing of nickel and nickel-base alloys, (11)587

FERRIC CHLORIDE
pitting and fatigue of 17-4 PH in chlorides, (5)273
pitting of zirconium in chloride solutions, (5)265
zirconium vs sulfide solutions, (12)615

Filiform effects, painted metals—review, (7)374
Fillers for coatings, corrosion of painted metals—review, (7)374

FILMING EFFECTS
behavior of ion plated Fe Cr alloy films, (6)314
chromium oxide former alloys in hydrogen, (1)32
corrosion products in energy systems, (4)191
heat exch vs fluidized bed coal combustion, (7)361
lithium hydrox vs zirconium-niobium, (1)23
Na sulfate temp vs SCC of tempered 403, (12)604
SCC ASTM A508 steel in hi temp water + O, (3)136
SCC 72-28 brass in sodium chlorate solutions, (12)609
surface composition stainless steel passivation, (1)46

FILMS CAUSES
hematite suspended in boiling water reactors, (1)15
S vs pitting of 304 SS in chloride solutions, (5)261
spectroscopy of oxide films on austenitic alloys, (6)299
surface composition stainless steel, (1)46

Fluidized bed cal gas, heat exch vs, (7)361
Fluorides, intergran SCC of aust SS below 100 C vs, (8)406
Fluosilicic acids vs, Fe, Au, Zn polarized electrodes, (12)599
Formic acids, SCC of brass in acetate and other solutions, (5)245
Fouling, nickel ferrite particles as corrosion models, (4)212

FRACTURE
crack tip in 304 by SCC and hydrogen embrit, (1)1
hydrogen embrittlement of amorphous FeNi, (9)464

Fundamentals, inhibition efficiency organic compounds, (1)60

G

GALVANIC CELLS
finite element analysis of corrosion cells, (5)295
galvanic attack on steel in chloride solutions, (4)226
galvanic attack on steel in NaCl solutions, (12)624
galvanic factors, steel vs ammonia, (3)168

Gases, iron in mineral acids, reaction rates, (3)171
General, inhibition 403 SCC in sodium sulfate solutions, (2)104
Gold, Fe, Au, Zn electrodes polarized, (12)599

GRAIN CAUSES
analysis of passive films on nickel, (2)85
effect of P on caustic cracking Ni Cr steel, (3)125
H induced cracking of aluminum alloy, (11)561
low alloy steels in hydrogen sulfide, (3)156
model for austenitic stainless sensitization, (2)42
Ni effects on hydrogen cracking of steel, (9)457
SCC Alloy 600 steam generator tubes, (1)40
sensitization of pure austenitic stainless, (9)468
sensitization of steel at low temperature, (11)596

GRAPHIC RECORDING OF DATA
AC impedance II—experimental + results, (11)570
computer program stability diagrams aqueous, (4)183
EMF-pH diagrams to predict corrosion, (10)541
impedance measurement from corrosion cells, (8)425
solid iron oxide zone in EMF-pH diagram, (8)453

Graphitization, of Ni-resist steel in sea water, (4)234

H

Halogens, zirconium vs sulfide solutions, (12)615
Hardening effects, surface prep vs 316 stress cracking, (8)437
Hastelloy B, fatigue, (11)587
Hastelloy C-276, fatigue, (11)587
Heat affected zone, tests continuous vs mold cast slabs, (1)59

HEAT EXCHANGERS
heat exch vs fluidized bed coal combustion, (7)361
hematite suspended in boiling water reactors, (1)15

HEAT FLUX
C steel vs hot NaOH under heat transfer, (5)256
hematite suspended in boiling water reactors, (1)15

HEAT TREATMENT
cooling, deformation effect on 304, (2)116
model for austenitic stainless sensitization, (2)42
velocity effects on SCC of carbon & 304, (2)76

HEATING
tests, continuous vs mold cast slabs, (1)59
crack initiation 304 in pure water, (1)53
intergran SCC of aust SS below 100 C review, (8)406
Ni effects on hydrogen cracking of steel, (9)457
nucleation growth cracks in austenitic S, (3)144
pitting and fatigue of 17-4 PH in chlorides, (5)273
pitting of zirconium in chloride solutions, (5)265
SCC Alloy 600 steam generator tubes, (1)40
SCC of 13 and 18 Cr steels in hi purity, (5)283
sensitization of austenitic stainless, (9)468
sensitization of steel at low temperature, (11)596

HIGH PURITY WATER
crack initiation 304 in, (1)53
fatigue of nickel and nickel-base alloys, (11)587
H induced cracking of aluminum alloy, (11)561
impurities vs SCC of 304 hi temp, (10)531
intergran SCC of aust SS below 100 C review, (8)406
oxidation of Fe_3O_4 on iron and steel surfaces, (7)357
SCC Alloy 600 steam generator tubes, (1)40
SCC ASTM A508 steel in hi temp water + O, (3)136
SCC of 13 and 18 Cr steels, (5)283

HYDROCHLORIC ACID
EMF-pH diagrams to predict corrosion, (10)541
Fe, Au, Zn electrodes polarized in, (12)599
H induced cracking of aluminum alloy, (11)561

iron in mineral acids reaction rates, (3)171
pitting and fatigue of 17-4 PH in chlorides, (5)273
pitting duplex 308L steel in methanol-water, (2)63
pitting of zirconium in chloride solution, (5)265
zirconium vs sulfide solutions, (12)615

HYDROGEN
alloying 4130 vs sulfide stress cracking, (10)515
chromium oxide former alloys in hydrogen, (1)32
electrochemical analysis, (4)218
H induced cracking of aluminum alloy, (11)561
H permeation of 1090, (9)486
hydrogen formation under anaerobic conditions, (2)98

HYDROGEN EMBRITTLEMENT
crack tip in 304 by SCC, (1)1
H induced cracking of aluminum alloy, (11)561
hydrogen delayed cracking of steel, (8)446
hydrogen embrittlement of amorphous FeNi, (9)464
lithium hydrox vs zirconium-niobium, (1)23
low alloy steels in hydrogen sulfide, (3)156
Ni effects on hydrogen cracking of steel, (9)457
occluded cells in SCC of AA 7075, (6)319

Hydrogen peroxide, impurities vs SCC of 304 in hi temp water, (10)531

HYDROGEN SULFIDE
alloying 4130 vs sulfide stress cracking, (10)515
chromium oxide former aloys in, (1)32
corrosion products in energy systems, (4)191
hydrogen sulfide in crude oil effects, (1)19
inhibitors for sour gas service, (7)384
intergran SCC of aust SS below 100 C review, (8)406
low alloy steels in, (3)156
Ni effects on cracking of steel, (9)457
zirconium vs, (12)615

I

IMPEDANCE EFFECTS
corrosion of painted metals—review, (7)374
measurement from corrosion cells, (8)425

Immersion, zirconium vs sulfide solutions, (12)615

IMPREGNATION
behavior of ion plated Fe Cr alloy films, (6)314
surface prep vs 316 stres cracking, (8)437

INCLUSIONS
fatigue crack initiation of 12-18 Cr steel, (8)431
hydrogen permeation of 1090, (9)486
Na sulfate temp vs SCC of tempered 403, (12)604
pitting duplex 308L steel in methanol-water, (2)63
tests continuous vs mold cast slabs, (1)59

INCOLOYS 800, 800H, 801
heat exch vs fluidized bed coal combustion, (7)361
nucleation growth cracks in austenitic, (3)144

Industrial atmospheric on-site testing, Cu sulfate infl on atmospheric rust form, (4)206

INHIBITORS
AC impedance II—experimental + results, (11)570
dye solutions vs Cr Ni steels, aluminum, (9)510
haloacetic acid inhib of brass in HNO_3, (10)525
inhibiting pitting of mild steel in neutral sol, (6)305
inhibition of zinc in sodium chloride solutions, (3)178
inhibition 403 SCC in sodium sulfate solutions, (2)104
inhibitors for sour gas service, (7)384
SCC sensitized SS in thiosulfate solutions, (3)130

Inorganic inhibitors, 403 SS in sodium sulfate solutions, (2)104

INSTRUMENTATION, TESTING
AC impedance II—experimental + results, (11)570
acoustic detection of steel attack, (1)9
C steel vs hot NaOH under heat transfer, (5)256
crack initiation 304 in pure water, (1)53
electrochemical potentiokinetic reactivation, (7)390
erosion of ceramics in coal slurry streams, (9)500
fatigue of nickel and nickel-base alloys, (11)587
hematite suspended in boiling water reactors, (1)15
hydrogen delayed cracking of steel, (8)446
hydrogen formation under anaerobic conditions, (2)98
impurities vs SCC of 304 in hi temp water, (10)531
inhibitors for sour gas service, (7)384
iron in mineral acids, reaction rates, (3)171
measurement of ohmic drop, (5)241
pitting and fatigue of 17-4 PH in chlorides, (5)273
predicting corrosion through research, (6)336
velocity effects on SCC of carbon & 304, (2)76

INTERFACE CAUSES
analysis of benzimidazole passive copper, (2)119
behavior of ion plated Fe Cr alloy films, (6)314
fatigue crack initiation of 12-18 Cr steel, (8)431
haloacetic acid inhib of brass in HNO_3, (10)525
oxidation of Fe_3O_4 on iron and steel surfaces, (7)357
pitting of zirconium in chloride solution, (5)265
spectroscopy of oxide films on austenitic SS, (6)299
surface comp SS during crevice corrosion, (3)180
surface prep vs 316 stress cracking, (8)437

INTERFACE EFFECTS
AC impedance tests on coated metals, (9)478
C steel vs hot NaOH under heat transfer, (5)256
corrosion of painted metals—review, (7)374
crack initiation 304 in pure water, (1)53
haloacetic acid inhib of brass in HNO_3, (10)525
iron with cellulose nitrate coating, (4)223
Na sulfate temp vs SCC of tempered 403, (12)604
nucleation growth cracks in austenitic SS, (3)144
pitting of passive iron III—chelation, (8)403
SCC Alloy 600 steam generator tubes, (1)40
surface composition stainless steel, (1)46
velocity effects on SCC of carbon & 304, (2)76
zirconium vs sulfide solutions, (12)615

INTERGRANULAR CRACKING
accel test for sensitization Cr ferritic, (6)327
impurities vs SCC of 304 in hi temp water, (10)531
intergran SCC of aust SS below 100 C review, (8)406
SCC of 13 and 18 Cr steels in hi purity, (5)283
SCC sensitized 304 in petro refinery, (6)347

INTERGRANULAR, EFFECTS
alloying vs impurity induced corrosion, (4)230
cooling, deformation effect on 304, (2)116
dissolved oxygen role in 304 IGSCC 285 C, (2)69
effect of P on caustic cracking Ni Cr steel, (3)125
electrochemical potentiokinetic reactivation, (7)390
H induced cracking of aluminum alloy, (11)561
model for austenitic stainless sensitization, (2)42

Iodine, haloacetic acid inhib of brass in HNO_3, (10)525

ION, ATOMIC EFFECTS
corrosion of painted metals—review, (7)374
surface prep vs 316 stress cracking, (8)437

Ionic causes, nickel ferrite particles as model corrosion, (4)212

IRON
AC impedance II—experimental + results, (11)570
corrosion products in energy systems, (4)191
Fe, Au, Zn electrodes polarized, (12)599
iron in mineral acids reaction rates, (3)171
nickel ferrite particles as model, (4)212
Oxidation of Fe_3O_4 on iron and steel, (7)357
pitting of passive iron III—chelation, (8)403
solid iron oxide zone in EMF-pH diagram, (8)453

MAGNESIUM CHLORIDE
electron microscopy of 316 SCC, (2)122
surface prep vs 316 stress cracking, (8)437

MANGANESE
hydrogen embrittlement of amorphous FeNi, (9)464
Na sulfate temp vs SCC of tempered 403, (12)604
sensitization of pure austenitic stainless SS, (9)468
tests continuous vs mold cast slabs, (1)59

MASS TRANSFER
hematite suspended in boiling water reactors, (1)15
hydrogen formation under anaerobic conditions, (2)98
Metal pipes, impurities vs SCC of 304 in hi temp water, (10)531
Metal structure, hydrogen permeation of 1090, (9)486
Metals, nonferrous, corrosion of painted—review, (7)374

METHYL ALCOHOLS
dye solutions vs Cr Ni steels, aluminum, (9)510
pitting duplex 308L steel in methanol-water, (2)63

MOLYBDENUM
alloying vs impurity induced corrosion, (4)230
fatigue of nickel and nickel-base alloys, (11)587
low alloy steels in hydrogen sulfide, (3)156
nucleation growth cracks in austenitic SS, (3)144
sensitization of pure austenitic stainless, (9)468
surface composition stainless steel passivation, (1)46

N

NACE standards, alloying 4130 vs sulfide stress cracking, (10)515

NATURAL GAS
inhibitors for sour gas service, (7)384
zirconium vs sulfide solutions, (12)615

Ni-resist cast iron, corrosion in sea water, (4)234

NICKEL
alloying 4130 vs sulfide stress cracking, (10)515
analysis of passive films on nickel, (2)85
fatigue of nickel and nickel-base alloys, (11)587
low alloy steels in hydrogen sulfide, (3)156
Ni effects on hydrogen cracking of steel, (9)457
nickel ferrite particles to model corrosion, (4)212
nucleation growth cracks in austenitic SS, (3)144

Nickel, fatigue, (11)587
Nickel-chromium-iron alloys, fatigue, (11)587
Nitrates, occluded cells in SCC of AA 7075, (6)319

NITRIC ACID
cooling, deformation effect on 304 in, (2)116
haloacetic acid inhib of brass in, (10)525
zirconium vs sulfide solutions, (12)615

Nitriding, fatigue crack initiation of 12-18 Cr, (8)431

NITROGEN
EMF-pH diagrams to predict corrosion, (10)541
sensitization of pure austenitic stainless, (9)468

NITROGEN INHIBITORS
pitting of mild steel in neutral, (6)305
sour gas service, (7)384

NONAQUEOUS LIQUID ENVIRONMENTS
EMF-pH diagrams to predict corrosion, (10)541
impurities vs SCC of 304 in hi temp water, (10)531

Nuclear reactors, hematite suspended in boiling water reactors, (1)15

NUCLEATION OF PITTING
H induced cracking of aluminum alloy, (11)561
nucleation growth cracks in austenitic SS, (3)144

O

Oils, petroleum production, zirconium vs sulfide solutions, (12)615
On-site or pilot plant testing, continuous vs mold cast slabs, (1)59
Optical testing, velocity effects on SCC of carbon & 304, (2)76

ORGANIC COATINGS
AC impedance tests on coated metals, (9)478
corrosion of painted metals—review, (7)374
iron with cellulose nitrate coating, (4)223

ORGANIC INHIBITORS
efficiency organic compounds, (1)60
403 SCC in sodium sulfate solution, (2)104

Orientation metal structure, overload infl on SCC of 7075 aluminum, (6)330

OXIDATION
analysis of passive films on nickel, (2)85
chromium oxide former alloys in hydrogen, (1)32
Cu sulfate infl on atmospheric rust form, (4)206
electrochemistry of passive layers on titanium, (5)237
heat exch vs fluidized bed coal combustion, (7)361
hematite suspended in boiling water reactors, (1)15
nickel ferrite particles as model corrosion, (4)212
oxidation of Fe_3O_4 on iron and steel surfaces, (7)357
spectroscopy of oxide films on austenitic, (6)299
zirconium vs sulfide solutions, (12)615

Oxides, solid iron zone in EMF-pH diagram, (8)453

OXYGEN
dissolved oxygen role in 304 IGSCC 285 C, (2)69
impurities vs SCC of 304 in hi temp water, (10)531
intergran SCC of aust SS below 100 C review, (8)406
SCC ASTM A508 steel in hi temp water + O, (3)136
zirconium vs sulfide solutions, (12)615

Oxygen embrittlement, impurities vs SCC of 304 in hi temp water, (10)531

P

Palladium, alloying 4130 vs sulfide stress cracking, (10)515
Particulates, nickel ferrite particles to model corrosion, (4)212
Passivating inhibitors, analysis of benzimidazole passive copper, (2)119

PASSIVATION CAUSES
analysis of benzimidazole passive copper, (2)119
pitting duplex 308L steel in methanol-water, (2)63
pitting of passive iron III—chelation, (8)403
polarization vs stress corrosion cracking, (3)181

PASSIVATION EFFECTS
analysis of passive films on nickel, (2)85
electrochemistry of passive layers on titanium, (5)237
fatigue of nickel and nickel-base alloys, (11)587
impurities vs SCC of 304 in hi temp water, (10)531
surface composition stainless steel passivation, (1)46
zirconium vs sulfide solutions, (12)615

PEENING
cooling, deformation effect on 304 in nitric acid, (2)116
impurities vs SCC of 304 in hi temp water, (10)531
pitting and fatigue of 17-4 PH in chlorides, (5)273

PERMEATION
alloying 4130 vs sulfide stress cracking, (10)515
inhibitors for sour gas service, (7)384
hydrogen permeation of 1090, (9)486
Ni effects on hydrogen cracking of steel, (9)457

Permeation failure, infl of P on Zn phosphate coating on steel, (4)201

pH CHANGES
computer program stability diagrams, (4)183
dissolved oxygen role in 304 IGSCC 285 C, (2)69
galvanic factors steel vs ammonia, (3)168
inhibition of zinc in sodium chloride solutions, (3)178
S vs pitting of 304 SS in chloride solutions, (5)261
SCC of brass in acetate and other solutions, (5)245

pH CONTROL
impurities vs SCC of 304 in hi temp water, (10)531
inhibition 403 SCC in sodium sulfate solutions, (2)104

pH METERS
analysis of passive films on nickel, (2)85
EMF-pH diagrams to predict corrosion, (10)541
fatigue of nickel and nickel-base alloys, (11)587
H induced cracking of aluminum alloy, (11)561
hydrogen formation under anaerobic conditions, (2)98
inhibiting pitting of mild steel in neutral sol, (6)305
iron with cellulose nitrate coating, (4)223

PHASE, METAL STRUCTURE
crack tip in 304 by SCC and H embrit, (1)1
hydrogen permeation of 1090, (9)486
intergran SCC of aust SS below 100 C review, (8)406
low alloy steels in hydrogen sulfide, (3)156
pitting and fatigue of 17-4 PH in chlorides, (5)273
pitting duplex 308L steel in methanol-water, (2)63
SCC of deformed 301 steel in acid chlorides, (10)549
sensitization of pure austenitic stainless, (9)468
sensitization of steel at low temperature, (11)596

PHOSPHATE CONVERSION COATINGS
AC impedance tests on coated metals, (9)478
infl of P on Zn phosphate coating on steel, (4)201

Phosphate Inhibitors, pitting of mild steel in neutral, (6)305
Phosphates, C steel vs hot NaOH under heat transfer, (5)256
Phosphoric acid, iron reaction rates, (3)171

PHOSPHORUS
alloying vs impurity induced corrosion, (4)230
effect of P on caustic cracking Ni Cr steel, (3)125
infl of P on Zn phosphate coating on steel, (4)201
pitting and fatigue of 17-4 PH in chlorides, (5)273

PITTING
behavior of ion plated Fe Cr alloy films, (6)314
C steel vs hot NaOH under heat transfer, (5)256
corrosion of Ni-resist steel in sea water, (4)234
crack initiation 304 in pure water, (1)53
fatigue crack initiation of 12-18 Cr steel, (8)431

Fe, Au, Zn electrodes polarized, (12)599
inhibiting pitting of mild steel in neutral sol, (6)305
inhibition 403 SCC in sodium sulfate solutions, (2)104
Na sulfate temp vs SCC of tempered 403, (12)604
nucleation growth cracks in austenitic SS, (3)144
pitting and fatigue of 17-4 PH in chlorides, (5)273
pitting duplex 308L steel in methanol-water, (2)63
pitting of passive iron III—chelation, (8)403
pitting of zirconium in chloride solutions, (5)265
S vs pitting of 304 SS in chloride solutions, (5)261
SCC ASTM A508 steel in hi temp water + O, (3)136
SCC of brass in acetate and other solutions, (5)245

PLATINUM
alloying 4130 vs sulfide stress cracking, (10)515
galvanic attack on steel in chloride solutions, (4)226

POLARIZATION RATES
acoustic detection of steel attack, (1)9
corrosion current, Tafel slope evaluation, (12)621
electrochem effects of chlorides, (9)494
haloacetic acid inhib of brass in HNO_3, (10)525
impedance measurement from corrosion cells, (8)425
inhibition of zinc in sodium chloride, (3)178
pitting and fatigue fo 17-4 PH in chlorides, (5)273
SCC of deformed 301 steel in acid chlorides, (10)549
SCC 72-28 brass in sodium chlorate solutions, (12)609

Potassium chloride, pitting of zirconium in, (5)265
Potassium environments, SCC of brass in acetate and other solutions, (5)245

POTENTIAL TESTING
AC impedance II—experimental + results, (11)570
computer program stability diagrams, (4)183
corrosion of Ni-resist steel in sea water, (4)234
EMF-pH diagrams to predict corrosion, (10)541
intergran SCC of aust SS below 100 C, (8)406
polarization vs stress corrosion cracking, (3)181
predicting corrosion through research, (6)336
SCC of deformed 301 steel in acid chlorides, (10)549

POTENTIOMETERS
AC impedance II—experimental + results, (11)570
electrochem effects of chlorides, (9)494
fatigue of nickel and nickel-base alloys, (11)587
Fe, Au, Zn electrodes polarized, (12)599
measurement of ohmic drop in potentiostats, (5)241
pitting of zirconium in chloride solution, (5)265
predicting corrosion through research, (6)336
resistance effect on potential scan rate, (10)556

Precipitation hardening steels, pitting and fatigue of 17-4 PH in chlorides, (5)273

PREDICTIVE CALCULATIONS
EMF-pH diagrams to predict corrosion, (10)541
polarization vs stress corrosion cracking, (3)181
predicting corrosion through research, (6)336
SCC of brass in acetate and other solutions, (5)245

Production, petroleum, zirconium vs sulfide solutions, (12)615

R

RATE OR ZONE CALCULATIONS
alloying 4130 vs sulfide stress cracking, (10)515
hydrogen formation under anaerobic conditions, (2)98
hydrogen sulfide in crude oil, effects, (1)19
iron in mineral acids reaction rates, (3)171
sensitization of steel at low temperature, (11)596

Refining, petroleum, SCC sensitized 304 in, (6)347

RESISTANCE, ELECTRICAL
measurement of ohmic drop in potentiostats, (5)241
resistance effect on potential scan rate, (10)556

REVIEWS
corrosion of painted metals, (7)374
intergran SCC of aust SS below 100 C, (8)406
Ni effects on hydrogen cracking of steel, (9)457

S

SEA ENVIRONMENTS
cathodic protection steel in, (4)233
corrosion of Ni-resist steel in, (4)234
impedance measurement from corrosion cell, (8)425
intergran SCC of aust SS below 100 C, (8)406
tests continuous vs mold cast slabs, (1)59

Sea on-site testing, galvanic attack on steel in, (12)624

SEGREGATION, GRAIN, CAUSES
crack initiation 304 in pure water, (1)53
dissolved oxygen role in 304 IGSCC 285 C, (2)69
electrochemical potentiokinetic reactivation, (7)390
SCC sensitized SS in thiosulfate solution, (3)130
sensitization of pure austenitic stainless, (9)468

SENSITIZATION
accel test for Cr ferritic, (6)327
impurities vs SCC of 304 in hi temp water, (10)531
intergran SCC of aust SS below 100 C, (8)406
model for austenitic stainless sensitization, (2)42
SCC sensitized 304 in petro refinery, (6)347
sensitization of austenitic stainless, (9)468
sensitization of steel at low temperature, (11)596
velocity effects on SCC of carbon & 304, (2)76

SHIELDED METAL ARC WELDING
impurities vs SCC of 304 in hi temp water, (10)531
tests continuous vs mold cast slabs, (1)59
zirconium vs sulfide solutions, (12)615

Silicic acids, C steel vs hot NaOH under heat transfer +, (5)256
Silicon, erosion of ceramics in coal slurry stream, (9)500
Silver, alloying 4130 vs sulfide stress cracking, (10)515

SODIUM CHLORIDE
AC impedance II—experimental + results, (11)570
alloying 4130 vs sulfide stress cracking, (10)515
behavior of ion plated Fe Cr alloy films, (6)314
crack tip in 304 by SCC and H embrit, (1)1
electrochem effects of chlorides, (9)494
EMF-pH diagrams to predict corrosion, (10)541
fatigue crack initiation of 12-18 Cr steel, (8)431
fatigue of nickel and nickel-base alloys, (11)587
galvanic attack on steel in, (4)226
inhibition of zinc in, (3)178
overload infl on SCC of 7075 aluminum vs, (6)330
pitting and fatigue of 17-4 PH in, (5)273
pitting of zirconium in, (5)265
S vs pitting of 304 SS in, (5)261
surface composition stainless steel passivation, (1)46

Temperature, 400 to 500 C, heat exch vs fluidized bed coal combustion, (7)361
Temperature, 500 to 600 C, sensitization of steel at low temperature, (11)596

TEMPERATURE, 600 TO 700 C
corrosion products in energy systems, (4)191
sensitization of steel at low temperature, (11)596

TEMPERATURE, 700 TO 800 C
sensitization of austenitic stainless, (9)468
sensitization of steel at low temperature, (11)596

Temperature, 800 to 900 C, SCC Alloy 600 steam generator tubes, (1)40

Temperature, 1000 to 2000 C, chromium oxide former alloys in hydrogen, (1)32

TIME
electrochem effects of chlorides in concrete, (9)494
SCC of deformed 301 steel in acid chlorides, (10)549

TITANIUM
electrochemistry of passive layers, (5)237
EMF-pH diagrams to predict corrosion, (10)541

TRANSGRANULAR CRACKING
SCC ASTM A508 steel in hi temp water + O, (3)136
SCC 72-28 brass in sodium chlorate solution, (12)609
sensitization of steel at low temperatures (11)596

Tungsten, erosion of ceramics in coal slurry stream, (9)500

U
UNDERWATER ENVIRONMENTS
chromium oxide former alloys in hydrogen, (1)32
dissolved oxygen role in 304 IGSCC 285 C, (2)69
dye solutions vs Cr Ni steels, aluminum, (9)510
galvanic factors, steel vs ammonia, (3)168
pitting duplex 308L steel in methanol-water, (2)63
velocity effects on SCC of carbon & 304, (2)76

V
Valves, erosion of ceramics in coal slurry stream, (9)500

VELOCITY
galvanic attack on steel in NaCl solutions, (12)624
velocity effects on SCC of carbon & 304, (2)76

W
Weight changes, three-point rate measurement evaluation, (11)580

X
X-RAY NONDESTRUCTIVE TESTING
analysis of passive films on nickel, (2)85
hydrogen embrittlement of amorphous FeNi, (9)464

Z
Zinc, inhibition in sodium chloride, (3)178
Zinc pigments, infl of P on Zn phosphate coating on steel, (4)201

ZIRCONIUM
lithium hydrox vs zirconium-niobium, (1)23
pitting of zirconium in chloride solutions, (5)265
zirconium vs sulfide solutions, (12)615

CORROSION DATA SURVEY

Quick Access to Useful Information on Corrosion . . .

Metals Section

A must for corrosion and materials engineers. Identifies metals which may have satisfactory corrosion performance in given environments, and gives vital information concerning reactions, other than corrosion rates, which may be beneficial. Updated in 1974. 283 pages, hard cover, 8¾" × 11¼".

$90 NACE Members
$112.50 Nonmembers

When ordering, please refer to Item No. 51070.

Nonmetals Section

Growing interest in the corrosion phenomenon as it relates to nonmetallic substances has fostered an increasing demand for new performance data. Corrosion Data Survey—Nonmetals contains vital performance data on 36 nonmetallic materials exposed to 803 corrosive solutions and gases. Included in this pertinent NACE publication are 7258 easily readable bar graphs which outline temperatures and percent concentration in water. The materials tested are deemed as being recommended, termed questionable, or not recommended for use in certain environments. An index of corrosives is also available for easy reference. Compiled by Norman E. Hamner.

$60.00 NACE Members
$75.00 Nonmembers

When ordering, please refer to Item No. 51097.

Note: All orders from Texas must include 5% sales tax. All orders from outside the US must include $3.00 for handling. All orders from Mexico and overseas must be prepaid. Proforma invoices will be sent for any orders which are not prepaid. Remittances from foreign countries must be by international money order or bank draft in USA funds. Shipping at any rate other than the most economical rate will be charged to the customer.
